Participation:

Be on time and ready to learn. Every class will provide practical techniques, skills and information for you to be successful in class. Many of the programs we learn are complex programs and take time to learn. You will need most of class time to learn what you need to complete your projects on time. If you miss in class instruction it is your responsibility to make it up on your own time. Grades are given weekly for effort and participation in classroom projects.

Course Objectives:

You will produce and exhibit a quality body of work demonstrating your understanding of digital media concepts and tools studied. You will demonstrate your understanding of planning, and production using a variety of file formats, and evaluations through written and oral forms.

Course Goals:

You will **understand** how to use advanced tools in Adobe Photoshop and Lightroom along with various file formats.

You will **explore** the elements of light, mood, HDR settings, and more with a personal focus.

You will **create** a portfolio of images you create during class using advanced camera settings, and software

Concepts and Big Ideas:

Explore design elements, technical quality, and conceptual concerns at an advanced level. Investigate works of art by artists and the visual problems they address. Understand import, export, and file management operations. Use decision-making skills to plan artwork and apply the correct techniques to create the work. Explore of careers in Photography

Vocabulary:

Analysis, Composition, Decay, Focus, Gel Lights, HDR, density, Light study, Panoramas, Passion, Phobias
